Wall Component Panel Designer Pre-Qualification:

Quality Buildings is looking for a creative, self-motivated, problem solver to join our design and drafting team. This individual needs to have good computer skills, have a positive attitude, possess good communication skills, and be open to taking direction from management. Candidate must possess the following skills:

- Experience in CAD / Mitek Panel Software
- Average or above Technical skills
- Ability to read and understand blueprints
- Understanding of construction / framing terms
- Strong attention to detail
- Manages time well
- The ability to prioritize, multitask, problem solve, meet deadlines, and have strong math skills
- Able to work independently and meet deadlines
- Knowledge of different species of material/lumber

Responsibilities for this position include but are not limited to:

- Designing top quality complete and accurate wall panels using Mitek Panel Software
- Create shop reports
- Create panel material lists
- Overlay floor and roof truss plans to ensure constructability
- Verify panel layout have all necessary dimensions
- Coordinate/Overlay panel designs with steel drawings
- Collaborate with project PM on project specifics
- Present all potential RFI's to PM prior to submitting to GC
- Present all RFI's with thorough detail and possible alternate solution
- Request project specific info such as RO's in a timely manner
- Attend weekly timeline meetings and participate in providing design timelines for specific projects

Please submit your resume to Jennifer Howard at jhoward@qualitybuildings.com
